
QuickNav not working

Posted by keveen2 - 2007/10/29 23:03

Joomla! 1.0.12 Stable <http://www.healthwealthandmusic.co.uk/loads> the menu items OK but when I select a menu item it does not Jump to the selected item. It used to work on another site.

Is there a way to fix it because it is a really useful module.

thanks
