
AlphaContent 3.0 \"Showauthor\"

Posted by artmovement - 2007/11/09 20:54

Hi,

Thanks for your great work...

but

I'm missing choice between „realname“ or „username“ configurating frontend layout. It has been added in version 2.5.8 already.

This option is depreciated on this version because the item displayed is original article by Joomla.

Is it possible to reactivate this function in the next version of AlphaContent? That would be very helpful presenting different articles of different users with their "username" only.

Thanks a lot!

Best regards,

artmovement.

This is a major problem for my website. I use AlphaContent for a member created library instead of a wiki. It's perfect ~ except that when someone writes an article, it displays their actual name instead of their username.

Please, I say PLEASE, can this be changed??? :(
