## AdressBook 1.2 - Letter-Filter-Bug

Posted by FSt - 2007/11/27 21:47

---

Hello

I have installed AdressBook 1.2 under Joomla 1.0.13. I have over 400 Files in the database. If I click one of the letters and there are more than 10 results, it is impossible to reach the datas above entry 10, neither the selector field "5,10,15,20,25,30,50", nor the buttons on the bottom of the page will work. The query allways falls back to the first entry of the first page.

best regards  
Martin

Is there any solution in sight?

Best regards  
Martin

I am also using the AdressBook 1.2 and would like to know if this issue was ever resolved. If so, where can I obtain the updated code.

Thanks,

Dave

P.S. I have added security so that one can not just put a shortcut to the URL and have added printing functionality and display of the picture of the individual.
