
Don't allow guests to post...

Posted by simpleuser - 2007/12/15 21:56

Is there a way to disallow guests sending posts under a registered users name?

What I mean is that when I'm logged out I'm still able to send a post as a guest on my registered name after filling that box manually.

I think this may allow some not really nice visitors to abuse the situation.
