
Image Height

Posted by alpe77 - 2007/12/18 15:41

Hi in the alpacontent 301 if i set the height of image, the image don't resize it, but it puts a black frame around the image.
If i change the width works fine.

Any suggest?

Best Regards

I have install alpacontent 303, but there's the same problem, why the height image not function, but the height is
associate at border of image?

There's a solution?

:(
