
pathway problem

Posted by alejo - 2007/12/31 22:30

Hello, i´m using the alphacontent component in this site www.epsilon.com.uy/Productos

It seems that the joomla pathway module doesn´t works well. maybe, im not sure. Can anybody check it? please. I´m using sh404sef.

I tryied deleting articles, and writing again, but the pathway is not showing the same after.

Great Regards

Yes with v3.0.1 the Joomla pathway is not correct with Opera Browser (double pathway and wrong ordering of path) and with Firefox near correct (breakline). The integreted Alphacontent pathway is okay. Perhaps it works with an other template
