

v3.0.1 XHTML 1.0 Transitional valid

Posted by lay - 2008/01/03 23:39

Perhaps someone can need this or Bernard take a look at this..... I don't know it is relevant but i used 3 colums on frontpage and 2 in section- categorylisting.
After this changes i passed validation with SGML Parser at W3C.org and also with HTML Tidy

File alphacontent.html.php

removed line 619: <tr>

removed line 103: <input type="text" name="searchfilter" class="inputbox" value="<?php echo
_ALPHACONTENT_SEARCH ?>" onFocus="this.value=";">

with
<input type="text" name="searchfilter" class="inputbox" value="<?php echo _ALPHACONTENT_SEARCH ?>"
onfocus="this.value=";" />

removed line 606: echo "\n<hr size=\"1\" noshade>\n";

with
echo "\n<hr size=\"1\" noshade=\"noshade\" />\n";

removed all: onClick

with
onclick

removed all: onChange

with
onchange

removed all: onFocus

with
onfocus

File alphacontent.layout.php

removed: <div id="title">

with
<div class="title">

removed: <div id="features">

with
<div class="features">

File alphacontent.class.php

removed: if (\$colspan>0) echo "<td valign=\"top\" colspan=\"\\$colspan\"> </td>";

with
if (\$colspan>0) echo "<td valign=\"top\" colspan=\"\\$colspan\"> </td></tr>";
