
mxcomment \'hack\'

Posted by MikeSel^ - 2008/01/06 14:08

Just thought I would share a 'hack' with everyone that I have done on my installtion..

This is a nice easy hack.. I recently surfed over to skype.com to download skype onto Kat's PDA, and noticed next to each article editors name was a nice simple little status indicator..

So I decided I would integrate it into my site! I think it looks quite cool, and is much nicer then a space hungry skype module!

Because I am using the MxComment component it was quite easy for me to edit the php files it uses to display the articles.

Check it out here

Sorry about that.. my site was down for a while but is now back up to stay!!!

Heres a copy of the modified template file.. Just incase :)

```

Re:mxcomment '\hack\'

Posted by MikeSel^ - 2008/12/22 01:09

I have now updated my code to work with the latest version of MxComment.

Here's my maxcomment.class.php file.
