
upgrade

Posted by heyjoe - 2008/01/31 12:57

How do I upgrade from 1.05 to 1.06 with all my comments / favuorityes etc. intact ???:blink:

Just uninstall and install new: all comments, favoured are preserved.

I just did this with 3.0.2 and all my menu items were erased. I'm using Joomla 1.5

Is that normal?

Hello,
You have not posted in the good forum. I think you say AlphaContent ?
It's normal. On uninstall, remove all menu linked to AlphaContent.

I am using mxComment v1.0.8 now, I want to upgrade to v1.0.9, can I just uninstall and reinstall?

Someone said the file /administrator/components/com_maxcomment/maxcomment_config.php should be backup and re-upload(see: http://www.visualclinic.fr/component?option=com_kunena/Itemid,55/func,view/id,2907/catid,14/), is it necessary?

Yes it's ok. Save your config file, uninstall and install new. Replace your config file, go to admin panel -> config and re-apply.
