## Problem with favoured

Posted by thuridilla - 2008/03/20 08:55

---

Hallo, I've got a problem with favoured articles:

When I try to add to favoured the system always answers y"ou have already added as favourites", even if it isn't true, and as a matter of fact if you look at the article you see favoured: none.

The problem is there since some days, I never had that before, and I cannot understand what has happened.

Mxcomment versione 1.0.6 today I upgraded to 1.0.7, same problem.

Joomla: 1.0.15 stable

MySql: 5.0.45

PHP: 5.2.5

I have mxcomment on another site and the problem is not present.

Which can be the reason for that? Have you got an idea? I don't know how to solve...

I think it can be a SEF component problem? I've got Jpromoter installed  
I noticed that if I disable mxcomment sef url and clear urls, than it runs correctly.  
Strange, since in the compliant component of Jpromoter there is mxcomment...

Hi, I have the same issue. have you a solution for that?

Thanks,  
Ron
