
editing comments in backend

Posted by giuse - 2008/03/23 16:30

Hi, comments seems not to be editable in backend: I get this error: "Class 'Comments ' not found in C:\www\libraries\joomla\language\language.php on line 171".

Any idea?

Thanks!

Giuse

Also getting this error in versions 1.0.6

Unfortunately I am unable to upgrade to 1.0.7 because of other issues.

Does anyone know of a fix to this problem?

It seems that the Joomla! want .ini file for language on that point... Mayby Bernard (admin) little fix the extension for that in future...?

Line 170-171:

```
$filename = ( $extension == 'joomla' ) ? $lang : $lang . '.' . $extension ;
```

```
$filename = $path.DS.$filename.'.ini';
```

So I noticed that also one of my testsite (J! 1.5.2 + mXComment 1.0.7 legacy)
