## 1.0.7 SEF URL issue

Posted by numb\_scot - 2008/03/29 15:42

---

The 'read more' link in 1.0.7 points to the article ID not the article name.

i.e. <http://localhost/287.html?task=view> where as it should be <http://localhost/article-name.html?task=view>

=====

---

Is this the way the 'read more' link is meant to work or have I done something wrong? :unsure:
