
Favour ajax based

Posted by nolvox - 2008/05/02 15:40

Hey,

First of all thanks for the great component.

But it would be really nice, when the favorite system would be ajax based. I think that's not too much work and many people would like it.

Of course ajax for comments and related articles, would be great running on ajax too, and I hope you will implement that soon.

Thanks

kind regards

Marco
