
Wonderful system, just one bug for me.

Posted by phero1 - 2008/05/29 13:58

Just has one bug for me.

It pushes down the other features such as the native "convert to pdf", "written by" and the rating system. I would really love for it to not interfere with the rest of the functions and stay below the article then it would be perfect. I'm almost finished translating it into Danish as well.

Check out my issue here: <http://introvert.dk/> see how the rating system, "written by", PDF and such are below the article since i installed Mxcomments.

You can also see it in the image I've included.

Kind regards,
Johnsen

Edit. Cant include my image here, it says it is too big even if its not. See the url instead please.

Hi there.

Care to share your Danish language file? :-)
