
images beside sections but in component

Posted by ddoebosic - 2008/05/29 14:37

hi people,

I would like to know if someone knows how to put 16x16 pixels images beside sections in alphacontent component, but not for image to be in frame of 80x60 pixels wich is deafult for joomla, at least I think its deafult.

help me people lets talk!
