
rating is not possible to switch off

Posted by dullrich - 2008/06/04 10:48

Hi,

I'm using alphacontent on our website. I don't want use the rating. In the component I switched off the rating, but the stars of the rating are still shown.

What is the problem??

Sorry for my bad english

Greets

Dirk

I asked the same question, but to no avail. Apparently the dev doesn't read the forum, or just doesn't bother to answer.

Go to Options tab and switch off System rating.
