
too much space w/ the readon!!

Posted by fabian - 2008/06/30 11:50

hi there, i got a little problem with my site with the mxcomment.

<http://agora.sc/cms/>

- 1) i have too much space between the article`s intro and the "read on" text. how can i edit the space?
- 2) i dont want any content items to be commentated. but at the end of the article (here: http://agora.sc/cms/index.php?option=com_content&task=view&id=65&Itemid=81) it says "keine kommentare vorhanden" which means in english "there are no comments" -> how can i get away this line?
- 3) is it allowed to hide the visualclinic footer? if it is, how can it be arranged?

thanks!!

Hey ya, did you figure out how to get rid of the space yet?

I have the same problem jsut now
