
How to refresh ratings?

Posted by Sleeper - 2008/07/09 16:51

Hi,

I'm using alphacontent for my new movie review site at <http://seenthismovie.com>, but decided to change the rating from 5 stars to 10, after having rated a few articles. I can't seem to find out how to remove the older ratings so that I can start fresh.

http://www.visualclinic.fr/components/com_joomlaboard/uploaded/images/rating.jpg

Could you please advice me?

With my best wishes,

HB

If my question was unclear:

I'm asking if I can remove the ratings in some way, either by manipulating a specific file or otherwise, in order to get a clean slate, to have a fresh new start with the ratings.

Can that be done?

Best wishes,

HB
