## have 1 problem and 1 question

Posted by Ginny - 2008/07/10 13:04

---

hi @ all

i hope someone can help me

so let me begin with my problem: i've selected that i want 3 columns for the categories but nothing happened..there is only one column on the left side. here the link to the side : [http://baupool.eu/index.php?option=com\\_alphacontent&Itemid=46](http://baupool.eu/index.php?option=com_alphacontent&Itemid=46)

and now my question: is it possible to show the description of the categories when they are in a list.because i want to have a picture next to the title of the category.. it should somehow like that <http://www.wallpaper-area.to/wa-2.php> .. it would be enough if i can show the intro text in the list

thank you  
Ginny

I looking aroun to find a question of my own and come across your post.

for the 3 colums, did you enter more than one section in the parameters of the alpha menu item?

For the images you can ask the component to take the first or last image of the article and in the menu alpha item you have few possibility to add images there.

Hope it help!
