## How to ask in forum?

---

I write this my opinion in this first category in English. (this time alphacontent old for J! 1.0.x... you know where is this for 1.5.x?)

I think, for all... is there better if we can take some information of our system and how that works??? etc. etc. etc.... stupid topic title... where them come... is that necessary?

That say nothing for anybody: "This don't work" "I try to install this but that doesn't work" "HELP"... etc. etc. etc.

So... I Think(my opinion) from all ours rules... tell in your question all normal information for users and admin so their is it easier to find out your problem much more easier.. maybe?

There is only one man how really support (developer) these extensions and please give him a time... also he is human being;) also he has vacation... It is no nice to see "BAD" information when he first time come to see to forum, please.

In our forum(finnish) I don't see these like message on fun at all...

Well, I guess I'll just post a BAD review at Joomla Extensions

Clearly the developer of this project is too busy or disinterested in responding to this issue!

Like that: How this work <--- wrong title

Like other information: <--- right style in post but for in English all information... in below is some text for Finnish, but I think you know point what I mean???... all information...

PHP luontipäivä: Linux finn1.XXXXXXX.net 2.6.9-67.0.7.ELsmp #1 SMP Sat Mar 15 06:54:55 EDT 2008 i686

And all (write access etc.) basic information what is very important for developer (admin) in that case.

Best Regards,
