## Listing Order

Posted by murshed - 2008/07/31 09:38

---

i have two questions:

1. how can i control the way AlphaContent orders the content listing?

i mean what happens now is that old listings are down and the new listings are up... how can i change that ?

\*how can i make the old listing up and the new ones come down?

\*how can i make the listing order based on the number of visits?

2. my site is in arabic, how can i make the directory-first page (right to left)? at the moment its left to right.

Thanks in advance
