
visual recommend profile link not in correct link

Posted by aymen - 2009/06/25 06:58

Hi

im using joomla 1.0.15 + com_visualrecommend 1.2.0

*my joomla sef set to No in site configuration (i dont use any sef component)

problem:

when i send/recommend article to people, i found out s below:

add link to my profile xxuser's profilexx : /index.php?option=com_comprofiler&task=userProfile&user=109&Itemid=1

i wanted it to show as

add link to my profile xxuser's profilexx :

www.mydomain.com/index.php?option=com_comprofiler&task=userProfile&user=109&Itemid=1

so that people can click on my profile link.

how or wher i shud change the code? really appreciate any helps with the code

thanx in advance
